

## Available in:

- A wide range of thicknesses and lengths, 75 gauge and 100 gauge available in stock
- Centerfold or single wound
- Clear or printed

## Purposes:

- A clear, low cost plastic sheeting (film) used to overwrap products and packages for protection and to keep people from opening the packages prior to purchase
- To bundle multiple products together
- To reduce cost of packaging a product
- To provide a see-through overwrap for a product and advertise at the same time

## Benefits of PVC Shrink Film:

- Use heat guns or shrink tunnels to shrink
- High slip for use in high speed automatic machines
- Very strong and flexible
- Low temperature (200° - 250°) shrinking
- Can be treated, printed and tinted

## Roll Lengths & Gauges:

Rolls/Gauge	75 Ga.	100 Ga.
Single Wound	4,000ft/roll	3,000ft/roll
Center Folded	2,000ft/roll	1,500ft/roll

# PVC SHRINK FILM

**Our PVC shrink film offers high mechanical strength, low temperature shrink and good protection for the product. Suitable for wrapping various products with manual and semi-automatic packaging machines.**
